DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-16 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by U. S. Patent No. 6,732,269 to Baskey et al.

As per claims 1-16, Baskey et al. disclose a secure intermediation method that provides for linking two secure sessions between a client and an intermediate node and server and the intermediate node.

In figure 4, Baskey et al. shows first secure communication session at 36 and a second secure communication session at 44.

Column 3, lines 34 to 40 disclose that the first secure communication session is linked (forwarded to the transaction server over the persistent secure connection) to the second secure communication session to enable communication from the client 10 (first node) to the transaction server (second node).

The intermediary is the router 42.

Allowable Subject Matter

Claims 17-23 are allowed.
